1. SUMMARY

I am a junior web developer and I try to broaden my area of expertise in web design and web development.

I have a dynamic nature, I am receptive to new technologies and ideas and I like doing research to improve myself and always find the optimal solutions.

I'm a sociable person and I like working in teams but I can also work alone. I'm ready to take on any challenge, I'm a quick learner and I'm always interested in learning something new.

During my free time, i experiment with different technologies and try different ways to improve my skills in web development and programing languages. I have basic knowledge of React and intermediary knowledge of CSS HTML and JavaScript

2. DOMAIN EXPERIENCE

I worked for 3 months on the UpWork site trying to get more experience.

Within 4 months I learned to create sites and different logos to improve my skills

Personal projects

I have created some personal projects with the purpose of deepening and fixing the accumulated knowledge.

3. CORE TECHNICAL SKILLS

Programming languages

/Libraries

/ Markup Languages

& technologies:

- **Web development (front-end):** JavaScript, HTML, HTML5, CSS, Bootstrap, ReactJS, SCSS, Redux
