1. SUMMARY

Junior web developer, trying to broad my area of expertise in web design and web development.

I have a dynamic nature, I am receptive to new technologies and ideas and I like doing research to improve myself and always find the optimal solutions.

More a quiet person, I can be sociable too, but I let my work and my results to speak for me. I don't like to brag

During my free time, I experiment with different technologies and try different ways to improve my skills in web development and programing languages. I have basic knowledge of React and strong knowledge of CSS HTML and JavaScript

2. DOMAIN EXPERIENCE

I worked for a short period of time on the UpWork, trying to get more experience.

I was capable creating basic single page websites

Personal projects

I have created some personal projects with the purpose of deepening and fixing the accumulated knowledge.

- *eCommerce V1.0 (ReactJs):* Single page application. I used the React basic concepts, was created with basics Routing elements, Redux concepts, firebase registration, style: Sass

- *Recipe app V1.0 (JavaScript):* I used more advanced JavaScript, DOM manipulation and Events, Objects and Functions, asynchronous JavaScript, Promises, AJAX concepts. Webpack, NPM, Babel concepts

3. CORE TECHNICAL SKILLS

Technologies:

- **Web development (front-end):** JavaScript, HTML, HTML5, CSS, Bootstrap, ReactJS, SASS.
- **Other skills (basic):** NodeJs, SQL, C#

Tools:

- Adobe Photoshop, Adobe Illustrator
